

## Harvard/MIT Econometrics Seminars

### 2014 FALL

- September 4 Bruce Hansen (University of Wisconsin-Madison)
- September 11 Anna Mikusheva (MIT)  
“Conditional Inference with a Functional Nuisance Parameter”  
(with Isaiah Andrews)
- September 18 Tyler VanderWeele (Harvard School of Public Health)  
“A Unification of Mediation and Interaction: A Four-way Decomposition”
- September 25 Don Andrews (Yale University)  
“Identification – and Singularity – Robust Inference for Moment Condition Models”
- October 2 Susan Murphy (University of Michigan)  
“Micro-Randomized Trials in mHealth”
- October 9 Alfred Galichon (Sciences Po, visiting MIT)  
“Costly Concessions: Estimating the Unintended Consequences of Policy Intervention in Matching Markets”
- October 16 Carolina Caetano (University of Rochester)  
“Identifying Marginal Effects with Binary Instruments or by Regression Discontinuity” (with Juan Carlos Escanciano)
- October 23 Larry Wasserman (Carnegie Mellon University)  
“Robust Topological Data Analysis”
- October 30 Tim Armstrong (Yale University)  
“A Simple Adjustment for Bandwidth Snooping”
- November 6 Susanne Schennach (Brown University)  
“Nonparametric Inference Using Bias Bounds”
- November 20 Frank Schorfheide (University of Pennsylvania)  
“Forecasting with Dynamic Panel Data Models”
