RESEARCH ASSISTANT – PROGRAMMING SUPPORT

Computer Science, Statistics and Economic majors wanted! A Harvard Business School professor in the Marketing unit is seeking research support. This role is a great opportunity to get first hand exposure to leading scholars and practitioners, and the opportunity to participate in the development, testing, and/or dissemination of new theory and related curriculum.

If you have experience in coding/programming, data collection and cleaning, running regressions and other statistical methods, and/or web scraping, and are eager to learn how to apply programming and analytical skills to research at the intersection of business and public policy, this might be the job for you!

Qualified and interested candidates should email a copy of their resume and transcript to the Recruiting Manager, Andressa Martins, at amartins@hbs.edu.

Preferred (but not required) education: Background in Statistics, Computer Science, Economics or related fields
Preferred (but not required) languages: STATA, R, Python

Please note:
The position requires a candidate who is located in the Greater Boston area.
Ideal candidates will be available for a minimum of 5-10 hours per week, starting ASAP.

BACKGROUND

The mission of Harvard Business School is to educate leaders who make a difference in the world. In support of the mission, HBS hires a large and diverse group of talented researchers. Research positions provide recent college graduates or current students with the unique opportunity to work with, and learn from, the world’s leading minds in management education and business practice.
