Part-time Undergrad Research Assistant Job:  
Health Economics Research

I am a PhD Candidate in Economics looking to hire one or two undergraduate research assistants (RAs) to help with a health economics project on the value of clinical trials.

About the job:
I am looking for RAs to help with data collection from data sources on clinical trials. The RAs will learn about how clinical trials in the U.S. are designed and conducted, how and why this design varies across disease areas and subpopulations, and how prescription drugs are regulated in the U.S. Additionally, the RAs will be trained in advanced technical skills such as conducting a systematic literature review and a meta-analysis. Most importantly, the RAs will learn how empirical research is conducted from behind the scenes!

Logistics:
**Pay is $14.50/hour.** RAs need to be work-study eligible and are able to commit an average of **10-15 hours per week**. The RA role will start as soon as possible and will go at least until **05/31/20** (with a possible extension into summer and/or fall).

Eligibility requirements:
**Undergraduate students who are (1) interested in health economics, clinical trials, or innovation in health, (2) federal work-study eligible, and (3) can commit 10-15 hours/week (on average) starting as soon as possible and until at least 5/31/20.** I’m looking for students who are interested in learning more about clinical trial design and regulation and are willing to devote regular time to research during the week.

How to apply:
If you are interested in applying for this RA job, please email me at ristovska@g.harvard.edu with the subject line "RA Application". In the body of the email, please confirm that you are work-study eligible. Then, attach the following items:
- CV
- Unofficial transcript
- Statement (~500 words) on why you are interested in health economics, innovation in health, biostatistics, or clinical trials

Note: The work is particularly relevant to economics and/or pre-med students, but you do not need to be working towards any specific concentration nor have coding experience to apply.

Feel free to email me at ristovska@g.harvard.edu if you have questions.

Best,
Ljubica “LJ” Ristovska
