

**Job Opening—Decision Economics, Inc. (DE)
(Boston, New York) (Remote)**

Economist – Full-Time, Permanent Position

Economist with Bachelor's Degree (or higher) in Economics for Economist position to start immediately.

Decision Economics, Inc. (DE) is an economic analysis and quantitative econometric model-based information system forecasting firm serving Corporations, Financial Institutions (Banks, Asset Managers and Traders), and Individuals since 1996. DE is located in Boston and New York, but the position is remote.

Responsibilities, in support of DE's President/CEO and its Clients, include consolidating and analyzing detailed global economic and financial markets data; maintaining and operating high-frequency econometric and time-series models and systems for economic indicators, analyses, and forecasting; updating and helping estimate the Sinai-Boston (SB) Model of the U.S. economy and financial markets and helping to maintain the software environment that houses the model; contributing to, and writing for, DE publications and other Client-oriented analytical reports.

Part-time with flexible hours possible.
