Fall 2023 Seminar in Econometrics schedule

September 14
Jonas Lieber (Cowles Fellow/Imperial College London)
Estimating Concentration Parameters for Bandit Algorithms
Harvard, Littauer M-15

September 21
Denis Chetverikov (University of California, Los Angeles)
“Spectral and Post-Spectral Estimators for Grouped Panel Data Models” (with Elena Manresa)
MIT E51-395

September 28
Angela Zhou (University of Southern California, Marshall Data Sciences and Operations)
“Robust Fitted-Q-Evaluation and Iteration under Sequentially Exogenous Unobserved Confounders” (with David Bruns-Smith)
Harvard, Littauer M-15

October 5
Haoge Chang (Microsoft Research, NERD)
“Design-based Estimation Theory for Complex Experiments”
MIT E51-395

October 12
Andres Santos (University of California, Los Angeles)
“Identification and Estimation in a Class of Potential Outcomes Models”
Harvard, Littauer M-15

October 19
Edward Kennedy (Carnegie Mellon University)
“Recent Advances in Minimax Estimation of Causal Effects”
(with Sivaraman Balakrishnan and Larry Wasserman)
MIT E51-395

October 26
Ulrich Müller (Princeton University)
“Spatial Unit Roots” (with Mark Watson)
Harvard, Littauer M-15

November 16
Kaspar Wuthrich (University of California, San Diego)
“Selection and Parallel Trends” (with Dalia Ghanem and Pedro H. C. Sant'Anna)
MIT E51-395

November 30
Elena Manresa (New York University)
“Adversarial Method of Moments” (with Ignacio Cigliui)
MIT E51-395

December 7
Jann Spiess (Stanford Graduate School of Business)
“Double and Single Descent in Causal Inference with an Application to High-Dimensional Synthetic Control” (with Guido Imbens and Amar Venugopal)
Harvard, Littauer M-16
